

VBCUA Analysis Report

Concept	Machine Learning
Generated	06 July 2026, 09:03
Language	English (auto-detected)
Word Count	21
Duration	9% silence, 143 WPM

OVERALL SCORE

80%	Strong Understanding Semantic: 79.1% Fluency: 81.0%
-----	---

AI Feedback

Excellent work! Your explanation demonstrates a strong command of the concept. Your delivery was confident and clear, with good speaking pace and minimal hesitation. Notably, your response contained no filler words, reflecting high communication fluency. Your speaking rate of 143 WPM is within the ideal range for comprehension. Keep practising to maintain this level of expertise!

Transcript

Machine learning is a subset of artificial intelligence that enables systems to learn and improve from experience without being explicitly programmed.

Semantic Analysis

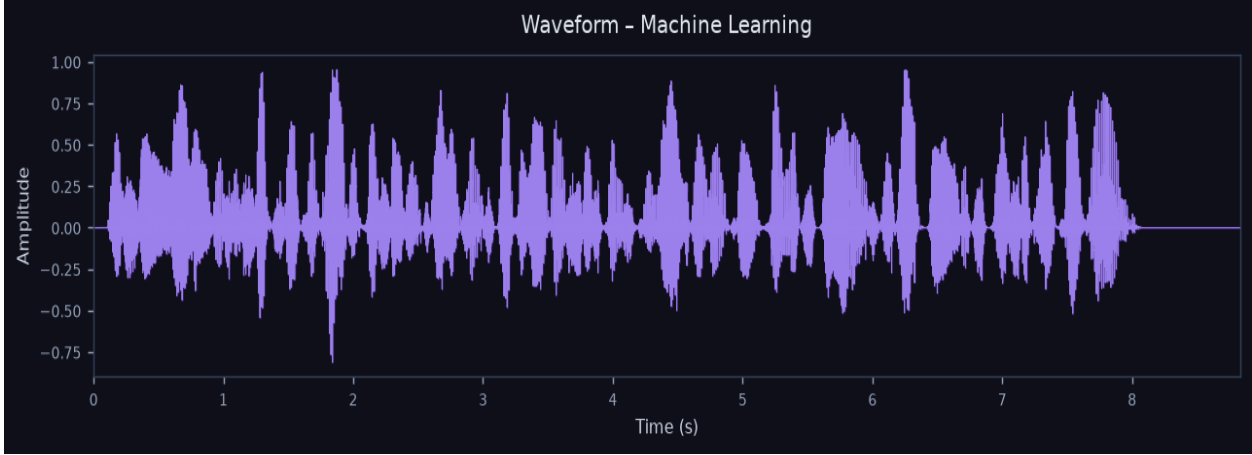

Metric	Value
Semantic Similarity Score	0.7915 (79.1%)
Weight in Final Score	60%
Keywords Covered	machine, learning, subset, artificial, intelligence, learn, improve, experience, without
Keywords Missing	focuses, developing, algorithms, access, predictions, decisions, supervised, unsupervised

Fluency & Speech Metrics

Metric	Value	Ideal Range
Fluency Score	81.0%	≥ 75% = Good
Speaking Rate	143 WPM	110–160 WPM

Total Filler Words	0	< 3 per response
RMS Energy Level	0.5402	Higher = louder
Pause Ratio	9.4%	15–30% = natural
Number of Pauses	0	—
Mean Pause Duration	0.00s	< 0.8s
Longest Pause	0.00s	< 2.0s
Mean Pitch (F0)	89.3 Hz	80–300 Hz
Pitch Variability	11.6 Hz	Higher = expressive
Voiced Ratio	70.0%	—

■ Audio Waveform

■ Mel Spectrogram
